Word of the Day

Wela'lin

In the Mi'kmaq language, a commonly shared concept related to kindness is:

"Wela'lin" (pronounced: we-la-lin)

While it is often translated as "thank you," it carries a deeper meaning of gratitude, appreciation, and kindness of spirit. In Mi'kmaq culture, expressing thanks is closely connected to showing kindness, respect, and acknowledging others. Kindness in Mi'kmaq worldview is also shown through actions—how you treat others, care for the land, and support your community.

CRRF-NAF Conference 2026

Corner Brook, NL

Conference/Program

Call For Pos

2026 Canadian Rural Revitalization Conference & North Atlantic Forum

June 16-18, 2026 | Grenfell Campus, Memorial University | Corner Brook, NL

Join us for a unique gathering of community leaders, Indigenous partners, government, researchers, policymakers, and grassroots organizations at the heart of Western Newfoundland. Hosted by Grenfell Campus in Corner Brook, this event will explore Relational Wellness in rural and northern contexts, weaving together community, culture, environment, and innovation.

Relational
Wellness:
Prioritizing
Connections that
Matter for
Sustaining Rural,
Island, and
Northern
Communities.

JUNE 16-18, 2026

Welcome! Pjila'si! Bienvenue!

Relational Wellness:
Prioritizing connections that matter in
Sustaining Rural, Island, and
Northern Communities

June 16-23, 2026 | Western Newfoundland

[Register Today](#)

A week-long gathering across Western Newfoundland exploring rural life through art, Indigenous knowledge, science, food, music, and community connection.

SHORE TO SHORE (S2S) is a series of unique gatherings in Western Newfoundland that will happen June 16-23, 2026 connecting rural, coastal, and Indigenous communities through shared experiences, storytelling, creativity, research, and celebration.

From Port aux Basques to the Great Northern Peninsula and Labrador, participants will explore the relationships between wellness, culture, environment, and place through community events, conversations, art, music, and local knowledge.

Community Happenings

PENWAAQ L'NU'K
NATIONAL INDIGENOUS PEOPLES DAY
COMMUNITY CELEBRATION

Join us as we celebrate Mi'kmaw culture, creativity, community, and connection through two special events!

JUNE 21, 2026 SOCIAL & TALKING CIRCLES

LOCATION:
Mi'kmaw Centre
Downstairs in the
Benoit First Nation Building

3:00 PM
Welcome and opening
of social gathering

3:15 PM
Talking Circles
Participants are invited to share
stories, experiences, and perspectives
in a respectful and supportive
environment

3:00 PM – 4:30 PM
Snacks and refreshments provided

DOOR PRIZES
Participants will have opportunities
to win door prizes throughout the event.

4:30 PM
Closing remarks and
conclusion of activities

JUNE 22, 2026 YOUTH CULTURAL & MURAL CELEBRATION

12:30 PM
Arrival of students from local schools

12:40 PM
Welcome and opening remarks

12:50 PM
Special Guest Speaker Presentation
Introduction to Mi'kmaw culture,
traditions, and community values

1:15 PM
Walk to the Desiree Mawio'mi Centre
Located at the bottom of Stephens Lane,
across from the Mawio'mi Grounds

1:20 PM
Community Mural Activity Begins
Students collaborate on a large mural,
expressing their interests, creativity,
and personal stories through art

1:20 PM – 2:00 PM
Snacks and refreshments available
throughout the activity

1:55 PM
Closing remarks and
group photo (optional)

2:00 PM
Event concludes and students depart

Everyone Welcome!
Come celebrate Indigenous culture, creativity,
learning, and community with Penwaaq L'nu'k.

Research Feature

Etuaptmumk in Action

FEATURING DR. ERICA HURLEY AND DR. KAREN DOODY

Each newsletter will include a Research Feature titled “Etuaptmumk in Action” which highlights community-engaged collaborations that have developed within the MBI Project. The features will be accompanied by short videos that involve researchers discussing their collaboration and community-partnered research.

The first research feature highlights Dr. Erica (Samms) Hurley and Dr. Karen Doody. Dr. Erica Hurley is a Mi’kmaq scholar and Assistant Professor in Memorial University’s Faculty of Nursing, cross-appointed with Humanities at Grenfell Campus. Dr. Karen Doody is an Assistant Professor in the Department of Environmental Science at Grenfell Campus, Memorial University.

From Left to Right: Dr. Erica (Samms) Hurley and Dr. Karen Doody.

Flat Bay

Research Feature

Etuaptmumk in Action

Keep an eye on this space as we will be releasing a short video featuring Erica's and Karen's collaborative research in the coming weeks.

Through their collaborative work, Karen and Erica bring together Indigenous and Western ways of knowing, being, and doing, showing how research can be shaped through respect, relationship-building, and shared learning. Together, their work reflects Etuaptmumk in practice by creating space for different knowledge systems to inform research, teaching, and community-engaged collaboration.

While the two first met at high school in Corner Brook, NL, Karen and Erica have recently partnered to establish the Transforming Relations and Convergent Knowledges (TRACK) Co-Lab. TRACK is a research collective that provides space and place for members to pursue research pathways that transform current practices in Indigenous and western scientific knowledge systems.

Developed through the MBI Project, TRACK is a collaboration of Dr. (Samms) Hurley's Wellness and Transformative Engagement in Research Relationships (WATERR) Lab and Dr. Doody's Health, Environment, and Aging Lab (HEAL), both of which are located at Memorial University's Grenfell Campus.

Marine Institute Trip

From left to right, Front: Vice-Chief Barbra Benoit (Benoit First Nation). Nina Tourett-Retieffe (Mi'kmaq Community Engagement Coordinator).

Conference Report

As part of the MBI project, community partners visited research spaces at the Fisheries and Marine Institute and in St. John's, including Dr. Kelly Hawboldt's lab, Dr. Javier Santander's lab, and Dr. Sukhinder Cheema's lab. These visits created valuable opportunities for Chiefs, community partners, project staff, and researchers to connect in person, learn more about the research being carried out, and strengthen relationships between community and science.

From Left to Right: Chief Peggy White (Three Rivers Mi'kmaq Band). Vice-Chief Barbra Benoit (Benoit First Nation). Yuna Zhang, Phd Candidate at Memorial University. Chief Terri Greene (Benoit's Cove Indian Band). Chief Joanne Miles (Flat Bay Band), and Past Chief Rhonda Sheppard (St. George's Indian Band).

Marine Institute Trip

During the Marine Institute visit, community partners toured the Food Processing Pilot Plant and learned about specialized research equipment used to support food processing, product development, and applied marine innovation.

From left to right, Back: Dr. Javier Santander, Chief Terri Greene, Chief Peggy White, Vice-Chief Barbra Benoit, Nina Tourett-Retieffe, and Chief Rhonda Sheppard

Conference Report

These visits provided wonderful opportunities to gain a deeper understanding of the studies being carried out, especially those connected to Mi'kmaw communities. It was meaningful to see the depth of research and the care taken in this work.

Overall, the Marine Institute and St. John's lab visits showed how shared learning can strengthen relationships, deepen understanding, and support respectful collaboration between communities and researchers.

From left to right : Dr. Kelly Vodden, Nina Tourett-Retieffe, Chief Rhonda Sheppard, Chief Peggy White, Vice-Chief Barbra Benoit, Dr. Kelly Hawboldt, Chief Terri Greene, and Chief Joanne Miles

Co-developing Knowledge

Chief Joanne Miles is leading a sacred ceremony with researchers and students, creating a respectful space for Mi'kmaq cultural practices, learning, and relationship-building to come together.

From left to right: Phan Dien Hong, Postdoctoral Researcher, Chief Joanne Miles, Dr. Sukhinder Cheema, Narmada Weerakkody, PhD student.

During a separate visit to St. John's, Chief Joanne Miles, Dr. Sukhinder Cheema, and her students had the opportunity to meet in Sukhinder's lab. The visit was especially meaningful because it included a sacred ceremony, creating a respectful space where Mi'kmaq cultural practices and university-based scientific learning could come together.

Rather than being only a lab visit, this gathering became a moment where culture, science, and learning were connected in practice.

“The strength of this work lies in the connection between community and science, when we come together, we not only share knowledge but create opportunities that benefit both our people and future generations.”

-Chief Joanne Miles (Flat Bay Band)
